

ABSTRACT OF THE DISCLOSURE

Footwear, incorporating a reversible a tongue, wherein one side or the other of the tongue may be adhered to the upper central vamp portion of the shoe, to display that side during wearing of the shoe, and can be turned to provide a variation in the styling of the shoe. The tongue may further contain a pouch or pocket, secured by any type of fastening device such as Velcro that allows ready access into the tongue, for deposit or removal of personal items. One or more of the surfaces of the formed pocket, in the tongue, may be formed of a transparent or clear material, to allow any personal item deposited therein to be readily viewed.
